

Google Drive Tutorials:

These are on YouTube—I viewed all of these for appropriate content. Just enlarge to full screen before you project, in case some of the ads or suggestion videos are iffy! Please note that “Google Drive” is the new name for “Google Docs”, it’s the same thing.

This video is slow and boring but it goes through the process clearly. I think this is the best intro I found, as of now, to Google Docs. Length 6:28

<http://www.youtube.com/watch?v=OBh8bMC7XEU>

This has some storage info that is a little over students’ heads but gives a decent overview. Length 4:46

<http://www.youtube.com/watch?v=rSKf9pBzJDU>

This is more of an advertisement that explains how Google Docs works. Not as great of an intro to Google Docs but gives a brief overview of their improvements and what you can do in Google Docs. Length 1:48

http://www.youtube.com/watch?v=6_hJ3R8jEzM

This is mediocre/cheesy (student created) but shows students how Google Docs can be collaborative for group work and how you can see who is doing the work. Best to show if/when doing group projects. Length 4:22

Best for teacher ideas:

This is great for teachers (and students?) to watch for ideas. Pretty funny & clever, top 10 uses for Google Docs in the classroom, just a little hard to see some of the samples. (Warning, he says “OMG” at 0:25). Awesome for SAMR model. Length 7:22
